

Dr. Vin Gupta

Tech Innovation Leader; Health Policy Expert; Chief Medical Officer, Amazon Pharmacy

Described as America's most widely recognized medical expert after Dr. Anthony Fauci, Dr. Vin Gupta, MD, MPA is a tech visionary who operates at the heart of disruption to develop solutions to the most-complex challenges in commerce, communication, healthcare, and society — now, and in the future. Close to two decades of experience as a renowned health policy expert and clinician have led Dr. Gupta to his current role as chief medical officer of Amazon Pharmacy, where he spearheads cutting-edge programs that are leading us into the interdependent futures of healthcare and technology. A uniquely public-facing figure keeping the world in the know about what's happening now and next, Dr. Gupta's forward-looking insights inspire leaders and their organizations to embrace change, think outside the box to break new ground, and create new inroads to innovation and success.

Exclusively represented by [Leading Authorities speakers bureau](#), Dr. Gupta leads a riveting session designed to spur audience members to think big and tap into their inner creativity and curiosity as their organizations navigate the changing business environment. He is especially skilled at drawing from, and connecting, his experiences in tech innovation, healthcare, and the military to share fascinating stories with valuable insights for adapting to the trends that will disrupt businesses, the future of leadership and change management, communicating for maximum impact, and preparing for what's to come for your organization and in your industry

Upon joining Amazon as principal scientist, Dr. Gupta soon found himself in the unexpected role of leading the tech juggernaut's pandemic response and served in various health tech-oriented roles before becoming chief medical officer. In addition to his work overseeing Amazon's foray into healthcare delivery, Dr. Gupta is a practicing pulmonologist and affiliate assistant professor at the University of Washington's Institute for Health Metrics and Evaluation, as well as a medical analyst for *NBC News* and a contributor to the *New York Times*. Concurrently, he is a commissioned officer (O-4 Major) in the United States Air Force Medical Reserve Corps, where he serves as the Officer-in-Charge of the Critical Care Air Transport Capability at Joint-Base Lewis McChord.

In his distinguished career working at the forefront of health and tech, Dr. Gupta has advised some of the world's largest companies, including Apple, the National Football League, and Major League Baseball. In addition to sitting on several boards and being a term member for the Council on Foreign Relations, he has held research roles at the Centers for Disease Control and Prevention, World Bank, the Center for Global Health Engagement, and Harvard Global Health Institute. He has been recognized with several awards and honors, including being named as one of the 40 Under 40 National Leaders in Minority Health by the U.S. Congressional Black Caucus and the American Medical Association.

Dr. Gupta is a powerful voice in technology and healthcare circles who is committed to sharing evidence-based perspectives across a broad range of critical issues to help organizations make purposeful decisions toward achieving their visions.
