

Salim Ismail

Exponential Strategist, Founder & Chairman of OpenExO, Founding Executive Director of Singularity University,
Former Yahoo VP

The Exponential Potential of Artificial Intelligence. Drawing upon insights from his latest book, "Exponential Organizations 2.0," leading AI expert and exponential strategist Salim Ismail leads audiences through a compelling overview of the critical role AI plays in the rapidly evolving business landscape. He provides a comprehensive analysis of AI's seismic impact across various sectors, underscoring the urgent need for organizations to understand and harness this disruptive technology for survival and growth. The discussion extends to illustrate how exponential attributes such as interfaces, algorithms, and dashboards can be employed to leverage AI effectively within an organization. Ismail also shares practical strategies for cultivating an AI-ready culture that promotes agility and innovation, thereby preparing organizations to ride the wave of AI, rather than being swept away by it. Lastly, he delves into real-world case studies of AI-driven exponential organizations, distilling transformative lessons from their journeys.

Disruptive Convergence: How Emerging Technologies are Reshaping Industries. In this talk, Salim Ismail, a leading emerging trends expert and innovation practitioner, describes the major breakthroughs occurring in a series of accelerating technologies, including artificial intelligence, robotics, biotech, sensors, neuroscience, medicine, and even energy. As he explains the potential uses of these technologies, as well as the possibilities they offer to organizations in any industry, he describes the implications of these breakthroughs on both society and business, and gives his perspective on their impact tailored to each specific audience.

Exponential Organizations: Unlocking the Secrets of High-Growth Disruptors. As a result of accelerating change, a new breed of businesses is scaling 10 times faster than established organizational structures. Business and innovation leader Salim Ismail calls this new breed of businesses "exponential organizations." In this talk, he describes the characteristics and attributes of these organizations, while outlining a detailed blueprint for how organizations can implement exponential ideas and philosophies into their companies.
