

## Amy Harder

National Energy and Climate Change Reporter at Axios

Amy Harder can speak on a range of energy, climate change, and environmental issues, relevant to both people in these areas and companies/groups outside of it.

### Speaking Topics:

**Energy Under Trump.** Washington's energy and environmental agenda has been turned on its head under President Trump. Amy breaks down complex energy and climate regulations to share digestible and thought-provoking takeaways and help groups understand how, in the age of Trump, new energy and climate policy will affect their industry or organization.

**The Future Of Energy.** We're in the middle of a massive energy transition, with big oil and gas companies beginning to invest in other energy resources, and renewables surging. Amy regularly interviews some of the biggest CEOs in the energy industry, giving her a unique insight into where the energy industry is headed and what they mean for businesses across the globe.

**The Future Of Climate Change.** Climate change is in the news now more than ever, with increasingly powerful storms and Capitol Hill moves—like the Trump Administration pulling out of the Paris agreement. Amy breaks down what to expect from a warming world in the coming years, touching upon extreme weather, rising sea levels, regulations, and more.

**Energy: The Vegetables Of Our Lives.** As kids, you probably didn't want to eat your vegetables, but you still needed them. That's how it is for energy: We don't really think about it but we need it for our lives and it's only when we don't have it that it's on our minds. Amy shares the psychology behind why people don't care, what factors make people care, and why it's important to remain invested in energy and climate issues now.

**Energy Prices & You.** What kind of costs can you expect to face from transportation, electricity, and heating/air conditioning? How will these costs change in the coming years? A lot of surprising factors are at play that could help drive your costs up—or down—unexpectedly, Amy Harder is able to pull back the curtain on likely outcomes now and possible outcomes in the future.
