

Alex Stamos

Chief Trust Officer of SentinelOne & Professor at Stanford, Former Chief of Security at Facebook

Cybersecurity, Geopolitics, and Information Warfare in the Modern Age. As a cybersecurity executive who has faced down the challenges of securing huge systems and investigating the actions of America's adversaries, Alex Stamos speaks from experience – drawing from his time leading security at Facebook and Yahoo to share today's geopolitical drivers for information warfare.

Building Trustworthy Companies: Security, safety and privacy as core values and functions. As a cybersecurity executive who has faced down the challenges of securing huge systems and investigating the actions of America's adversaries, Alex Stamos speaks from experience – drawing from his time leading security at Facebook and Yahoo to share difficult lessons on crisis prevention and management. Discussing the current threat landscape, Stamos arms organizations with the means to fight back against cybersecurity breaches, insider threats and propaganda online. Stamos provides the actions companies should take to understand their risk profile, to integrate adversarial thinking into their business decisions and what it means to build a "trustworthy company."
