

## Douglas Rediker

Leading Geo-Economic Authority and Geopolitical Expert; Founder & Chairman, International Capital Strategies,  
Former IMF Board Member

**A Global Perspective of Today's Economy.** Douglas Rediker is recognized as a foremost expert on the global economy and has been a leading voice chosen by our nation's leaders to represent the United States on global economic matters. In this talk, he breaks down today's issues in international economic policy, the financial markets, global capital flows, and the relationship between current foreign policy and the economy, and puts forth ideas for developing solutions to market challenges. He masterfully connects what's happening in the economy to specific industries and demonstrates to groups the potential impact on their organizations.

**The Confluence of Geopolitics and Geo-economics.** Throughout his career as an influential figure working at the intersection of geopolitics, macroeconomics, policy, and the global financial markets, Douglas Rediker's insights on the economic and financial aspects of hot-button geopolitical issues have been highly sought after by world leaders and top organizations. In this talk, he analyzes the top geopolitical and geo-economic issues, themes, and risks in today's state of play, while providing foresight into how events may unfold and the potential aftermath for business and society.
