

## Mike Gallagher

U.S. Congressman (R-WI, 2017-2024), Head Of Defense at Palantir Technologies & Marine Veteran

**Cybersecurity in Focus: Practical Strategies for Cyber Preparedness.** Regarded as one of Congress' cybersecurity leaders during his tenure in Washington, Dr. Mike Gallagher draws upon his expertise in national security and experience in Chairing the Cyberspace Solarium Commission to provide a compelling analysis of the evolving threats we face in our interconnected world. From ransomware attacks to state-sponsored cyber espionage, this cybersecurity keynote offers practical insights and strategies to safeguard critical infrastructure and protect against emerging cyber threats.

**Navigating The New Cold War: What the Future U.S.-China Competition Holds.** As one of the foremost foreign policy experts during his seven-year tenure in Congress and the founding Chairman of the Select Committee on China, Dr. Mike Gallagher explores the complexities of America's economic and technological competition with China, with practical recommendations on what the private sector needs to do to prepare. Dr. Gallagher identifies the critical technologies that will shape the trajectory of U.S.-China competition, and how technological advances are changing the character of modern warfare.

**Politics Unpacked: How the Modern Congress Really Works (and Doesn't).** Former Republican Congressman Mike Gallagher won a swing district in 2016 and turned it into a conservative powerhouse, all while maintaining one of the most bipartisan records in the Congress. In this talk, he offers a historically informed understanding of how the modern Congress works and why it often doesn't, as well as an overview of the trends and voting patterns shaping elections.

**Intelligence Insights: Understanding the Threats to U.S. National Security.** Dr. Mike Gallagher served in the military as a counterintelligence/human intelligence officer and later as one of Congress' leading experts on strategic intelligence and a member of the House Permanent Select Committee on Intelligence. In this talk, he delves into current and emerging threats to U.S. national security, how these threats are different from previous periods in American history, and what businesses, non-government organizations, and everyday Americans need to do to secure themselves in an increasingly unsecure world.
