

Jeremy Rifkin

Founder and President of the Foundation on Economic Trends

The Third Industrial Revolution and a Zero Marginal Cost Society. The Global Economy is in crisis. Economists warn that we face another 20 years of declining productivity, slow growth, steep unemployment, and increasing inequality. The economic downturn is fueling growing discontent toward governing institutions and spawning extreme political movements around the world. And now, after 200 years of industrial activity, scientists report that climate change is ravaging the planet, taking us into the sixth mass extinction of life on Earth. Where do we go from here?
