Award Winning Entrepreneur, Venture Capitalist, Best-Selling Author and Innovation Expert

The Great ReWrite. We are living in the largest institutional and human shift in the history of our species. It is a complete resetting of the operating system of our planet. *The Rewrite* is a multi award-winning talk and series in partnership with Forbes on the future of our world and the way that organizations can stay relevant and thrive. It's a playbook for the post innovation era. Innovation as a concept has failed us. It has become void of meaning and thus crippled companies ability to respond to the world being rewritten around them. What's next? *The Great Rewrite*. That's what.

Kapital. We are entering into a post currency era; the reign of nation states over money is now over. As the blockchain allows individuals and organizations to launch their own economic systems, the global capital markets will have to react and respond. This may be the largest shift in the movement of money ever.

Beyond Human. There is a great deal of confusion around what AI is and what it is actually capable of. Beyond Human decodes the world of artificial intelligence from the perspective of its impact on the core competencies of an organization. It puts in place a roadmap for how one can understand the impact of an era when the human brain is no longer the most sophisticated hard drive on earth. It's about practicality, not scientific theory. We are standing at a great precipice in human history. It's time to demystify AI and truly understand what it is and how it can be harnessed to propel organizations to their next level of growth and purpose.
