Physician, Futurist, Public Health Expert, Fellow Royal Society of Medicine, Author

Healthcare AI Strategy & Real ROI Organizations feel pressure to act on AI. Few can separate measurable value from marketing momentum. Audience takeaway: practical criteria for defensible AI investment decisions.

Trust in Healthcare AI Healthcare begins with trust. Technology does not. This keynote clarifies what leaders must protect as automation expands. Audience takeaway: guardrails for accountability, transparency, and trust.

Algorithmovigilance & AI Governance Healthcare monitors safety continuously. AI should be no different. Barry introduces algorithmovigilance as a public-health-driven oversight model. Audience takeaway: an operating approach leaders can defend.

Patient Safety & Clinical Workflow Redesign AI succeeds when workflows evolve. It fails when clinicians are forced to work around it. Audience takeaway: principles for redesign that strengthens safety and clinician confidence.
