Gerard Lyons

British Economist and Economic Policy Adviser

The global economic and financial outlook Key forces shaping growth, inflation, interest rates, and financial markets in an increasingly uncertain global economy

The Gulf and Middle East: demographics, diversification and future growth How demographic change and economic diversification are reshaping long-term growth prospects across the region

The economics, finance and geopolitics of the G3 world: the US, China and the new non-aligned bloc The shifting balance of global power and its impact on trade, investment, and geopolitical stability

The new globalisation with a grassroots agenda and the green economy How globalisation is evolving, with greater emphasis on sustainability, inequality, and the transition to a low-carbon economy

The UK and the need for a three arrows pro-growth agenda A framework for boosting UK growth through supply-side reform, investment, and long-term economic strategy
