Indu Subaiya

CEO of Healthcare in Action | Co-founder & Former CEO of Health 2.0

Tech Innovation & Disruption In The Healthcare Ecosystem Discussing how technology is innovating, disrupting, and improving healthcare. Tech healthcare disrupters discuss operating and changing the delivery model. How to not only survive, but thrive, in the current dysfunctional state of healthcare from the perspective of patient health, access, treatment, or interactions to the system. You will walkaway with a better understanding of how major healthcare stakeholders are becoming critical partners in the health care tech ecosystem and the value they perceive from tech innovations and investments.

10 Years of Health 2.0 Reflecting on the past ten years, Indu Subaiya, the Co-Chairman and CEO of Health 2.0, will highlight the top accomplishments in health care and how technology has played a role, as well as the challenges that still need to be addressed.

Transforming Traditional Medicine With Digital Therapeutics A discussion on digital therapeutics making evidence-based waves in healthcare.

The Role of Tech In Value-Based Care This keynote will cover key trends in AI and digital health technology today as we aim to deliver whole person care while improving care coordination and addressing the social drivers of health. Dr. Subaiya will review opportunities in technology to transform and advance equitable health in a value-based environment when many health systems face provider shortages, sicker patient populations and challenges with health literacy and the digital divide. Examples of innovative solutions and services for both urban and rural environments and best practices for delivering tech-enabled care in culturally relevant contexts will be provided. The presentation will cover new virtual-first care models, effective uses of data aggregation and tracking as well as how digital health companies are helping health systems build and strengthen partnerships with community based organizations to improve access and extend that “last mile” of care.

Fringe Technology Will Transform Healthcare Indu discusses the next phase of health innovation and why we have to keep looking at fringe technology to transform healthcare.

Welcome To Healthcare's Decentralized Future A discussion of the five key drivers of a future of decentralized healthcare.
