Michael Coates

Former CISO at Twitter, Mozilla, CoinList & CyberSecurity Founder

Building a Cybersecurity Program the Board Loves and Hackers Hate A pragmatic guide to constructing a modern security program that balances speed, leverages emerging technology, and navigates regulatory and compliance demands — without slowing the business down.

AI & Cybersecurity: Adopting and Accelerating Emerging Innovation Securely A candid look at embracing AI-driven innovation responsibly, drawing on real-world examples of catastrophic failures alongside the guiding principles that separate organizations that get it right from those that don't.

How Hackers Are Penetrating Critical Infrastructure, National Defense, and the Fabric of Society A high-energy, eye-opening tour of the modern threat landscape — from nation-state attacks to the vulnerabilities hiding in plain sight — and the defensive posture every organization needs to adopt before it's too late.
