Regina Barber

Astrophysicist, NPR Short Wave Co-Host, and Trailblazing Voice in Science Communication and STEM Equity

History's Hidden Wonders: Astonishing Scientific Events Almost No One Knows About. From skies that glowed in unexpected places to stars bright enough to outshine the day, history is full of astonishing scientific events most people have never heard of. Dr. Regina Barber uncovers these hidden stories with energy and wit, revealing the science behind them and leaving audiences curious to discover more.

How Experts Can Communicate Their Work to Anyone. Great ideas only matter if people understand them. Dr. Regina Barber shows scientists, engineers, and technical professionals how to cut through jargon, find the story in their work, and explain complex ideas in ways any audience can grasp and remember.

Moderator. Dr. Regina Barber is a skilled moderator who brings energy, warmth, and clarity to panels, fireside chats, and Q&A sessions.
