Robin Wright

Award-Winning Journalist, New Yorker Columnist, Author, and Leading Expert on the Middle East, Iran, and U.S. Foreign Policy

The Future of the Middle East A MacArthur “Genius” Fellow with decades on the ground across the region, Wright goes beyond the headlines to the people rewriting the Middle East’s future — reformist judges, feminist organizers, underground bloggers — and explains how their quiet defiance is reshaping a region the world still misreads.

On Iran Few reporters have covered Iran as closely, or as long, as Wright — reporting that earned her a National Magazine Award. She walks audiences through how a nuclear standoff, a shifting regional balance of power, and decades of failed diplomacy have made Iran the country Washington can least afford to misunderstand.

Global Trends: Reading the World's Next Chapter Having reported from more than 150 countries on all seven continents — including expeditions to both the North Pole and Antarctica — Wright brings a rare, ground-level vantage point to the political, economic and military currents reshaping the century, and what they mean for the decisions leaders make next.
