Steve Wozniak

Co-Founder of Apple and Founder, Chairman, & CEO of Wheels of Zeus

Robotics, AI, & Automation Steve Wozniak is a legend in the robotics and automation arena. He is the man who designed the machine that crystallized what the personal computer would become: The Apple II. He believes the development of robotics today parallels to the development of the desktop computer over 30 years ago. In this presentation, Steve shares his insight on the realm of robotics and offers outlook as to future trends and where technology will take us.

The Apple Story Wozniak and Steve Jobs founded Apple Computer in 1976. Between Wozniak's technical ability and Jobs's mesmerizing energy, they were a powerful team. In this presentation Steve Wozniak shares the backstory as to how Apple came to be the world renowned organization we know it as today.

Innovation & Creativity One of the early innovators of the microcomputer revolution, Wozniak co-founded Apple Computers, designing both the Apple I and the Apple II. He was awarded the National Medal of Technology from President Ronald Reagan for his innovations, which effectively paved the way for the personal computer industry.

Wearables Steve Wozniak is a gadget guy. He drives a Tesla, rides a Segway, has a remote controlled device that lights up his luggage at baggage claim, and even uses a toothbrush holder that sticks to the mirror. He loves getting his hands on new devices, especially innovative wearables. In this presentation, Wozniak talks about the potential of wearables and the direction they are headed.
